Session : 9:00am – 11:00am

RSVP:
mkarstaedt@beyondcompliance.com
713-940-0621

Join Beyond Compliance to learn how our web-delivered Integrated Compliance Management System (**ICMS™**) can provide a complete business process to manage regulatory and corporate policy compliance.

Currently used by North American energy companies, ICMS addresses both the needs of the field employee and corporate management. It dramatically improves the data collection and analysis of important compliance related information. ICMS significantly reduces the "paper chase" allowing for near real time identification and action of non-compliance events.
